SKILLS

- Programming Languages: PHP, Javascript, C & C++.
- Framework: Laravel Livewire.
- Fundamentals: Problem Solving, Data Structure & Algorithms, OOPS and DBMS.
- Web Design: HTML, CSS, Bootstrap and Mary-UI.
- Databases: MySQL.
- WebDev Tools: VS Code, Postman, Version control Git & Github

PROJECTS

Department Management System

- Department management system where students view their current and next-day class schedules, assignments. Also teachers can view their class schedules, profile, assign tasks, results and publications with full CRUD functionality.
- Implemented role-based authentication with separate user, teacher and admin dashboard and giving admins full control over managing notice, class routine, exam, batch, subjects all over students and teachers functionality.
- Technologies used: HTML, CSS, and Bootstrap, Laravel and MySQL.

Skill Development System Management

- This platform enabling users to progress through course topics, complete tests, and receive a final grade saved to their profile. Course access requires login, and users can contact the admin via email.
- Implemented role-based authentication with separate dashboards, giving admins full control over managing courses, topics, questions, and answers.
- Technologies used: HTML, CSS, and Bootstrap, Laravel and MySQL.

Library Management System

- Developed an online platform for users to locate books in nearby libraries by title, displaying available libraries sorted by proximity. Results include library name, book title, author, and location, enhancing access to local library resources.
- Implemented role-based authentication with separate user and admin dashboards. Admin can full control over managing books, authors and libraries.
- Technologies used: HTML, CSS, and Bootstrap, Laravel and MySQL.

EDUCATION

BSc in Computer Science and Engineering.

Faridpur Engineering College, Engineering and Technology Unit, University of Dhaka.

2019 – 2024

Faridpur

COMPETITIVE PROGRAMMING

Online Judge Solutions - Solved Problems: 102

- Language: C & C++
- Platform: Beecrowd

COURSES

Web Development with PHP & Laravel

2024 – present

Ostad

- Building dynamic and robust web applications.
- Developed a solid foundation in PHP and Laravel framework.
- Completed some web development projects.
